📍 Cổ Nhuế, Bắc Từ Liêm, Hà Nội

OVERVIEW

Software Engineer with over three years of experience creating dynamic web applications. I am skilled in component-based architecture, state management, and API integration, with a foundational knowledge of backend technologies like Springboot and Postgres, allowing me to contribute to end-to-end solutions. My goal is to secure a role with opportunities for professional growth and career advancement.

EDUCATION

Hanoi University of Science and Technology   08/2018 - 05/2023

Computer Engineering - Bachelor

English: Toeic 600, CEFR - B1

ViettelPost - NOC System   03/2024 - Now

Software Engineer

Build new product and extend current product interface. Implement the assigned tasks from the leader. Review teammate's code and document. Deploy appliaction to develop, staging environment. Write documents and build code. Support teammate at work

FPT Software - Hofuri-M   03/2023 - 03/2024

Software Engineer

Implement the assigned tasks from the leader. Implement the customer's request. Unit Test by Jest. Support teammate at work

Rikkeisoft - Myforex   03/2022 - 03/2023

Developer

Develop website interfaces. Support other members in the team. Guide new members.

VTI Corporation   07/2021 - 12/2021

Intern

Intern Fullstack Developer with Angular, .NET

Trí Nam   03/2021 - 06/2021

Intern

Intern Fullstack Developer with Angular, .NET

WORK PROJECTS

NOC System

(03/2024 - Now)

Name of customer	All empoyees and customer of Viettel Post
Description project	Bussiness Product
Your team size	25
Your position in project	Frontend Developer
Your responsibility in project	• Architected and developed new features for a business product, extending existing interfaces using Angular 14 and Ionic for an application serving all Viettel Post employees and customers • Enhanced code quality and maintainability by conducting peer code reviews and creating thorough documentation • Collaborated with and supported teammates to troubleshoot technical issues and ensure project milestones were met
Technology description	HTML5, CSS, TypeScript, Angular 14, Ionic Framework, Ant Design, Highchart, videojs, Map, Springboot, Postgres

Hofuri-M

(03/2023 - 03/2024)

Name of customer	Software company from Japan
Description project	The project implements stock comparison web development.
Your team size	120
Your position in project	Frontend Developer
Your responsibility in project	• Engineered and implemented frontend features for a stock comparison web application from mock designs, directly addressing customer requests. • Ensured application reliability and stability by writing comprehensive unit tests using Jest.
Technology description	HTML5, CSS,TypeScript, VueJS 3, Vuex, React, Redux, Jest

Myforex

(03/2022 - 03/2023)

Name of customer	Software company from Japan
Description project	Forex site
Your team size	70
Your position in project	Frontend Developer
Your responsibility in project	• Developed responsive and logical user interfaces for a Forex site using VueJS 2 and NuxtJS, translating mock designs into functional web screens. • Onboarded and mentored new team members, guiding them on project architecture and coding standards.
Technology description	VueJS 2, NuxtJS, Vuex, TypeScript, HTML, CSS, MySQL

PERSONAL PROJECT

Project III - E-Commerce website   06/2021 - 08/2021

Developer

Knowledge of HTML, CSS, TypeScript, Angular. Use C# .Net, AspNetCore, EntityFrameworkCore
- Build website interface
- Design operations and write reporting documents for the Project
- Design database for the project.
Github https://github.com/chungTA0609/PJ

Graduation thesis - Time Keeping Management Website   10/2022 - 02/2023

Developer

Use HTML, CSS, TypeScript, VueJS, NuxtJS to build website. Use NestJS to building backend. MySQL to Design database
- Build website interface
- Design operations and write reporting documents for the Project

- Design database for the project.
